We, as your service providers, always strive to provide assistance and support to our valued clients during emergencies.

What is the maximum weight for my trek bag

We recommend keeping the weight of your trekking bag limited to a maximum of 15kgs. Each porter has the capacity to carry up to 30kgs. Our arrangement includes one porter assigned to carry the duffel bags of two clients. It's important to note that you are allowed a total luggage weight of 15 kgs, including your handbag, for the Lukla flight. Additional charges apply for any excess baggage that exceeds this limit.

Where can I leave my extra things and valuables while I am on the trek?

We understand the importance of ensuring the safety of your belongings while you are away on the Everest Base Camp trek. To provide peace of mind, the hotel we partner with in Kathmandu offers a securely locked room where your extra belongings can be stored safely. You can trust that your possessions will be well-protected during your trek.

In addition to the **hotel** storage option, we also offer a safe storage facility at our office. You can confidently leave your belongings with us, knowing that we have taken appropriate measures to keep them secure until your return.

We prioritize the safety and security of our client's belongings and strive to provide reliable storage solutions while you embark on your adventure.

Do you Provide porters on the trek to carry all our gears? Do you provide us duffle Bags?

Yes, we do provide porters on the trek to assist you with carrying your gear. Our experienced and reliable porters are accustomed to the terrain and altitude, ensuring that your belongings are safely transported throughout the trek. They are trained to handle the physical demands of carrying heavy loads, allowing you to focus on enjoying your journey.

In addition to providing porters, we also offer duffle bags for your convenience. These durable and spacious bags are specifically designed for trekking purposes, allowing you to pack your gear efficiently. Our duffle bags are provided to ensure that your belongings are organized and protected during the trek.

By offering both porters and duffle bags, we aim to lighten your load and enhance your trekking experience, enabling you to fully immerse yourself in the beauty of the Everest Base Camp trail.

What happens if I get sick

Our highly skilled Local Sherpa guides have undergone rigorous training in mountain first aid and are well-versed in addressing altitude-related illnesses. In the event of severe altitude problems, our recommended solution is always to descend to a lower elevation. It is important to note that the vast majority of our clients successfully complete the Everest base camp hike each year without experiencing any major issues.

However, in the event that a participant falls ill or encounters an accident, we have a **comprehensive evacuation**

plan in place. Our Sherpa guide will immediately contact us if someone falls sick or is injured, and we will arrange a helicopter as soon as possible.

To ensure the utmost care and support, we always maintain an adequate number of staff members within our crew. This allows us to assign a dedicated person to accompany and care for any sick or injured clients while the rest of the group can continue their trek or climb if they choose to do so.

Rest assured, the safety and well-being of our clients are our top priorities, and we are fully equipped to handle any unforeseen circumstances with efficiency and professionalism.

Do mobile/ cell phones work while on trek? Can I buy a Nepal SIM card and which is best network

There are now cellphone masts installed at Gorakshep, enabling 3G connectivity throughout the Everest Base Camp trek. The best network above Lukla on the Everest Base Camp trek is NCell. Please note that in order to obtain a Nepal SIM card, you will need to provide a photocopy of the details page of your passport and one passport photo. Our guide will assist you in purchasing a SIM card. Additionally, all our guides are equipped with local mobile phones. You may choose to share the guide's number with your family for callbacks, or you can make international calls from the guide's mobile and reimburse him directly for the cost.

Are solo female travelers safe on Everest base camp Trek

We guarantee the travel safety of all our trekking guests, irrespective of their gender. Nepal, as a whole, is an incredibly safe and welcoming country for foreign visitors. As a local responsible Sherpa company with over **25 years of experience**, we have established longstanding and strong relationships with the Sherpa lodges we frequently utilize, ensuring their safety and reliability. Moreover, our Sherpa guides are highly reliable, trustworthy, and consistently vigilant in keeping track of all guests' whereabouts throughout the trek.

What would be normal group size & how many porters and trekking staff are in the group

Mountain Sherpa Trekking & Expeditions is committed to the well-being of our porters, and we take careful consideration in calculating our trekking weights to avoid overloading them. We provide one porter for every two trekkers. Additionally, we assign one expert local Sherpa guide for every two people. In the case of five trekkers, we provide an extra assistance Sherpa guide. This arrangement ensures that even if someone in the group falls ill, the trip can proceed as planned.

While we can accommodate groups of any size, based on our extensive experience, we have found that a maximum of eight to twelve people is the ideal size for a successful trip. However, if you prefer a smaller group, a solo trek, or a private family trek, please let us know, and we will gladly arrange a private Luxury Everest Base Camp trek with helicopter return to Lukla tailored to your specific requirements.

Do the tea houses/ lodges have electricity? Can I charge my iPod or camera

In the Everest Base Camp trek, most lodges and tea houses have electricity, allowing you to charge your iPod or camera batteries while on the trek. However, it's important to note that lodges and tea houses may charge a fee for the charging service, typically ranging from 1 USD to 3 USD per hour.

How much should I plan to give in tips to my guides, porters and driver

Tipping for the guides, driver, and porters is not included in the price of your tour. However, it is customary to provide something extra to your staff after completing a special trek. It's important to note that tipping is not mandatory, but rather a way of expressing gratitude for their services after a successful trip to Everest Base Camp. During the pre-trip meeting in Kathmandu before starting the trek, you will be provided with the recommended tipping ratio for the guide and porter. As a general guideline, we suggest allocating a minimum of 10% of your total trip cost for tipping the entire local staff.

How much additional money do I need per day

For meals in Kathmandu, budget around USD \$10 to \$15 per lunch or dinner. This should cover your expenses at local eateries and restaurants.

During trekking, allocate about USD \$10 to \$15 per person per day. This budget can be used for water, snacks like chocolates, and a few drinks along the way.

What happens if the flight from Lukla or Kathmandu is delayed

This is a very practical matter regarding the return from Everest Base Camp trek by helicopter. However, many companies do not take it seriously. The flights between Kathmandu and Lukla are generally reliable, but if the weather is unfavorable, they can be canceled for the entire day. Our 12-night and 13-day itinerary includes an extra contingency day in case of delays. If your flight is delayed in Kathmandu, we will rebook your flight for the next day. We may also be able to provide an option for a privately chartered helicopter. If you choose to take the helicopter, this can cost an additional \$150 to \$500 or more, depending on availability and group size. Extra hotel nights in Kathmandu will be provided when flights are delayed. If your flight is delayed in Lukla, we will cover the cost of accommodation and meals.

What about payment, do you need a advance booking deposit

Once you have confirmed your booking, we require an advance deposit of 25% of the total trip package for 100% confirmation. You can make the deposit payment using either a credit card or through a bank wire transfer. The remaining balance for the trek needs to be paid in Kathmandu on your arrival day. After confirming your trek booking, we will provide you with detailed information on how to make the deposit payment.

For more information regarding payments options visit this link: [Payment options](#)

It's important to note that the trek deposit is non-refundable. However, if necessary, you can postpone your travel date within a period of 3 years. Your deposit will remain valid for this duration, allowing you to choose any date within that timeframe for your travel.

What is your success rate for reaching the Everest base camp & ascent of Kala Pattar at 5,545m

We take pride in our Everest base camp trek return by helicopter, which has achieved a **99% success** rate to date. This remarkable success is primarily due to the expertise and experience of our local Sherpa guides and staff. As a 100% local Sherpa company in Nepal, all our guides and staff hail from the Everest region. Sherpas are highly respected as elite mountaineers and are renowned for their extensive knowledge of the local area. They have played an invaluable role in assisting early explorers in the Himalayan region, serving as guides for expeditions to climb Mount Everest, especially at extreme altitudes and challenging passes.

Another crucial factor contributing to our success is our specially designed itinerary that prioritizes proper acclimatization. We have incorporated two additional days during the critical acclimatization period to ensure the well-being and safety of our trekkers. We spend one night in **Namche Bazaar (3,440m/11,286ft)** and an additional night in **Dingboche at (4,410m/14,465ft)**. This deliberate approach allows trekkers to gradually adapt to the increasing altitude, reducing the risk of altitude-related illnesses and enhancing their overall trekking experience.
